

# Module 10

Module [1 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-1\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-1)  
[2 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-2\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-2)  
[3 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-3\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-3)  
[4 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-4\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-4)  
[5 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-5\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-5)  
[6 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-6\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-6)  
[7 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-7\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-7)  
[8 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-8\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-8)  
[9 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-9\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-9) **10**  
[11 \(https://onlinelearning.berkeley.edu/courses/2291660/pages/module-11\)](https://onlinelearning.berkeley.edu/courses/2291660/pages/module-11)  
[Final \(https://onlinelearning.berkeley.edu/courses/2291660/assignments/33623128\)](https://onlinelearning.berkeley.edu/courses/2291660/assignments/33623128)

## Module 10

### Miscellaneous Topics

In Module 10 we examine a hodgepodge of remaining topics.

Run Time Type Interrogation (RTTI) lets you figure out an object's type on the fly at runtime. There is great debate on the value of RTTI. Generally it may be avoided with suitable use of virtual functions.

Another topic up for consideration is *static members*. A static data member is shared across all objects of a class. A static function is invoked as a normal function, with no invoking objects.

Finally, we examine some important terms from Object-Oriented Design and see what they mean.

[Learning Objectives](#)

[Lectures](#)

[Reading](#)[Discussion](#)[Assignment](#)[Source Code](#)[Course Evaluation](#)

## Learning Objectives

- RTTI
- Static members
- Ideas from OOD/OOP: Has-A and Is-A relationships

## Lectures

### Presentation

- [10.1: Comments on Reading Assignments for Module 9](#)  
(<https://onlinelearning.berkeley.edu/courses/2291660/pages/topic-10-dot-1>)
- [10.2: Static Members](#)  
(<https://onlinelearning.berkeley.edu/courses/2291660/pages/topic-10-dot-2>)
- [10.3: Run Time Type Identification \(RTTI\)](#)  
(<https://onlinelearning.berkeley.edu/courses/2291660/pages/topic-10-dot-3>)
- [10.4: Has-A and Is-A Relationships](#)  
(<https://onlinelearning.berkeley.edu/courses/2291660/pages/topic-10-dot-4>)

## Reading

The reading for this Module is C review. Depending on your C background, you may be able to move through this material quickly.

### Required Readings

- *C++ Primer Plus*, Chapter 15

### Recommended Readings

- *Thinking in C++ Volume One*, pp. 331–364, 721–756

## Discussion

 [Module 10 Discussion](#)

([https://onlinelearning.berkeley.edu/courses/2291660/discussion\\_topics/14351902](https://onlinelearning.berkeley.edu/courses/2291660/discussion_topics/14351902))

## Assignment

 [Module 10: Short Answer 10](#)

(<https://onlinelearning.berkeley.edu/courses/2291660/assignments/33623130>)

There is no programming assignment for this module.

## Source Code

In each module of this course, you will be required to submit a programming assignment. For each module, I have prepared sample source code for your reference. Please take a few minutes to download and install all of these programming examples. The files have been compressed into one zip. You will need a zip utility to decompress the file.
