Module 7 Discussion

Module 7: Advanced Inheritance

1. Describe a hierarchy where private inheritance would be useful.
2. Discuss real world objects that can be modeled using multiple inheritance.
3. Describe three different hierarchies that involve ADTs.

Post your response as a reply to my original message. Critique at least one other student's response, by replying to his/her message.

NO DUPLICATE POSTINGS or examples from our text! Each entry must be unique by each student for all postings for all mod
