

Module 1: Short Answer 1

Start Assignment

- Due No Due Date
- Points 100
- Submitting a file upload
- File Types docx, doc, rft, and txt

Short Answer Questions

1. List at least five good reasons for using functions in code development.
2. Why do we use function prototypes?
3. What does the following statement do?

```
using namespace std;
```

4. In C++, what is the maximum character length for variable names?
5. When possible, why is it preferred to use integer data types instead of floating point?

Be sure to include your name and assignment number in the file name, as such:
